## TECHNICAL BULLETIN

**Subject:** CAPRI problem resolution  
**Distribution:** OMC Technical Support, State System Technicians as needed  
**Date:** July 7, 1998

---

**Symptom(s):** During general operation of CAPRI for Windows 95, CAPRI screens do not size properly. Some screens will be excessively large and rendering the application unusable.

**Cause:** Windows font is set to large.

**Resolution:** Change Windows font to small.

1. Select Start / Settings / Control Panel.
2. Select the Display icon within Control Panel.
3. Select the Settings tab.
4. Change Font Size to "Small Fonts".
5. Select the Apply button, then the OK button to close the Display form.
6. Close Control Panel.
